**Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability**

1. The questions whether the claimed invention appears to be novel, to involve an inventive step (to be non-obvious), or to be industrially applicable have not been examined in respect of:
- ☐ the entire international application,
  - ☒ claims Nos. 21,22, with respect to industrial applicability  
because:
    - ☒ the said international application, or the said claims Nos. 21,22, with respect to industrial applicability relate to the following subject matter which does not require an international preliminary examination (specify):  
**see separate sheet**
    - ☐ the description, claims or drawings (*indicate particular elements below*) or said claims Nos. are so unclear that no meaningful opinion could be formed (*specify*):
    - ☐ the claims, or said claims Nos. are so inadequately supported by the description that no meaningful opinion could be formed.
    - ☒ no international search report has been established for the said claims Nos. 21,22, with respect to industrial applicability
    - ☐ the nucleotide and/or amino acid sequence listing does not comply with the standard provided for in Annex C of the Administrative Instructions in that:
      - the written form ☐ has not been furnished
      - ☐ does not comply with the standard
      - the computer readable form ☐ has not been furnished
      - ☐ does not comply with the standard
    - ☐ the tables related to the nucleotide and/or amino acid sequence listing, if in computer readable form only, do not comply with the technical requirements provided for in Annex C-*bis* of the Administrative Instructions.
    - ☐ See separate sheet for further details

**see separate sheet**

**Re Item III**

**Non-establishment of opinion with regard to novelty, inventive step and industrial applicability**

For the assessment of the present claims 21 and 22 on the question whether they are industrially applicable, no unified criteria exist in the PCT Contracting States. The patentability can also be dependent upon the formulation of the claims. The EPO, for example, does not recognize as industrially applicable the subject-matter of claims to the use of a compound in medical treatment, but may allow, however, claims to a known compound for first use in medical treatment and the use of such a compound for the manufacture of a medicament for a new medical treatment.

**Re Item V**

**1. Cited Document**

The following document is referred to in this communication:

D1 : US-A-2002/0061932

**2. Novelty**

D1 discloses (see example 1 on pages 4 and 5) tablets which are prepared by wet-granulating a drug mixture comprising the drug 5-methyl-2-(2'-chloro-6'-fluoroanilino)phenylacetic acid and the suspending agents MCC and CMC Na with an aqueous suspension. It is believed that the resulting mixture is in the form of a suspension and has a pH of between 4,75 and 5,25. The subject-matter of claims 1,2,5,6,8,21,22 is therefore not new (Article 33(2) PCT).

**3. Inventive Step**

Should the applicant overcome the abovementioned novelty objection, he should note that the present application appears to be inventive over the prior art (Article 33(3) PCT).

(SEPARATE SHEET)**

**4. Industrial applicability**

Claims 21 and 22 relate to subject-matter considered by this Authority to be covered by the provisions of Rule 67.1(iv) PCT. Consequently, no opinion will be formulated with respect to the industrial applicability of the subject-matter of these claims (Article 34(4)(a)(i) PCT).

Claims 1-20 satisfy the criterion of industrial applicability set forth in Article 33(4) PCT.
